🚨 HONEST ASSESSMENT:

MAJOR ISSUES IDENTIFIED:

1. **Onboarding Wizard**: Completely non-functional - only shows welcome screen

2. **Trading Actions**: Quick Trade and Full Trade buttons do nothing

3. **Dashboard Actions**: Most action buttons are cosmetic only

4. **Mode Switching**: Toggles show tooltips but don't change UI

ACTUAL FUNCTIONALITY RATE:

- **Working Features**: ~60%

- **Non-functional Features**: ~40%

- **Critical Missing**: Onboarding wizard, trading actions, mode switching

RECOMMENDATION:

Platform needs significant development to make non-functional buttons actually work. Many features are visual placeholders without backend functionality.
