📋 Manus Master Task Tracker – Bio-Quantum AI Platform

🔗 Phase Overview

This tracker outlines the current and upcoming responsibilities for Manus as we enter the full integration and demo testing phase for the Bio-Quantum AI Trading Platform.

Knowledge Engine v2.0 – Integration Tasks

- [ ] Upload and structure "Knowledge Engine v2.0" document in Notion
- [ ] Tag all applicable Notion content with semantic metadata
- [ ] Scaffold Smart Content Router (context engine, semantic parser)
- [ ] Connect ChatBot responses to Knowledge Nuggets
- [ ] Test user-profile-based access controls
- [ ] Begin implementation of personalized learning paths
- [ ] Configure investor, developer, and demo modes

🕐 Investor Demo Enhancements – Tasks

- [ ] Implement mouseover tooltip overlay icons (color-coded or branded)
- [ ] Create and test modal overlays with Notion links
- [ ] Populate demo script for each user flow:
- [ ] Quantum Wallet
- [ ] Portfolio Dashboard
- [ ] RL Agent Trainer
- [ ] DAO Profit Engine
- [ ] Knowledge Nugget trigger zones
- [ ] Activate toggle system: Developer / Investor / Demo
- [ ] Setup analytics logging for user interaction paths

🛡️ Investor Presentation Materials

HTML5 Dynamic Version

- [ ] Finalize all slide content and transitions
- [ ] Add mouseover tooltips synced to Notion
- [ ] Host secured online version with watermark option

PowerPoint (PPTX) Version

- [ ] Rebuild deck using final layout and brand style
- [ ] Embed speaker notes or tooltip hints
- [ ] Sync with hosted version + investor summary PDF

🗂️ Notion Workspace Population

- [x] Deep folder structure (3 levels) created
- [ ] All uploaded documents mapped to sections
- [ ] Contributor invite area configured (Richard's brother)
- [ ] Add embedded PDF and executive summary viewers
- [ ] Searchable tags for all strategic features
- [ ] Setup content-sharing permissions + version control

🔧 Technical Infrastructure Support

- [ ] Validate and maintain staging/test URLs:
- [x] Quantum Wallet Pro: https://hpbkaszh.manus.space
- [x] Profit Allocation Engine: https://qjh9iecevlvl.manus.space
- [x] Public Demo: https://lpakodpw.manus.space
- [x] Staging System: https://dwitkelz.manus.space
- [ ] Upload full `bio-quantum-ai-final-demo-package.tar.gz`
- [ ] Link Knowledge Engine APIs to platform UI layer
- [ ] Test fallback system and session recovery

📈 Add-Ons (To Be Scheduled)

- [ ] Prototype AI Chat Groups for advanced users
- [ ] Toggle-based browser sidebar for Knowledge Nuggets
- [ ] Sponsor integration engine and analytics triggers
- [ ] Launch voiceover onboarding script (optional)

🔦 Progress Log

(Will be updated continuously during development)

Date	Action Completed	By
07/04	All secure staging systems verified	Manus
07/05	Knowledge Engine specs finalized	ChatGPT

🔐 Version

Master Task Board Version 1.0 Created: July 5, 2025
